## PREMIUM SAW GUIDE OILS

OILPRO™ ADVANCED Premium Saw Guide Oils are blended with premium paraffinic base stocks and specially selected additives to reduce friction between the saw and guide in thin Kerf Saws. They promote longer saw guide and saw blade life when operating in severe service. They are designed to reduce rust and corrosion and to promote cooler operation. They exhibit superior film strength to create boundary lubrication and provide excellent extreme pressure properties. The additive emulsion is optimized to allow the correct mixing of water and oil. They are tacky to enable the oils to cling to blade and guide components.

### TYPICAL PROPERTIES

ISO VISCOSITY GRADE	100	150
Product Number	01209203000100089	01209203000150089
Viscosity Information		
Viscosity @ 40C, cSt	95	143
Viscosity @ 100C, cSt	11.3	14.5
Viscosity Index D2270	100	
Flash Point, COC (C) D92	240	260
Pour Point, C (C) D97	-24	-21
Color D1500	<2	<2
Gravity, API D287	30.0	31.7

### APPLICATIONS

OILPRO ADVANCED Premium Saw Guide Oils utilizes modern additives and technology and are formulated to deliver excellent wear, rust control, improved pitch and resin deposits in applications

### FEATURES

- EXCELLENT CHEMICAL STABILITY
- CLEANER ADDITIVE REDUCES FRICTION
- PREMIUM RUST/OXIDATION RESISTANCE
- LEADING CORROSION PROTECTION
- FIRST CLASS CUTTING EFFICIENCY
- INDUSTRY LEADING EQUIPMENT PROTECTION

### ORDERING INFORMATION
