

SUPPLYPRO truDEF is a diesel exhaust fluid manufactured with 32.5% high purity synthetic urea and 67.5% deionized water designed for use in passenger vehicles, trucks, construction and agricultural equipment. It is compatible with all Tier 4 final compliant equipment using Selective Catalytic Reduction (SCR) technology. truDEF prevents SCR breakdown, reduces harmful nitrogen oxide emissions by 90% and even improves fuel efficiency by up to 8%. It is a simple-to-use, low cost, clean solution for meeting the new 2010 EPA Clean Air Act requirements.

Purity of diesel exhaust fluid is important to maintaining a functioning SCR system. Any chemical impurity in DEF can lead to failure of an SCR system. That is why it is very important to use only DEF products that meet ISO 22241-1 standards. truDEF is a stable, colorless, nonflammable, nontoxic fluid. truDEF conforms to the ISO-22241-1 specification for DEF, is API registered and meets or exceeds OEM specifications. We ensure a quality product with an extensive, redundant quality management process, controlling specifications through the entire product channel—from manufacturing through distribution to the end user.

PHYSICAL AND CHEMICAL PROPERTIES

Boiling Point	>212°F
Crystallization Point	12°F
Pounds/Gallons	9.10
Specific Gravity	(Water=1) 1.09
Vapor Density	(Air=1) 0.6 H ₂ O, >1
Water Solubility	100%
Appearance	Colorless Clear Liquid
Odor	None to Slight Ammonia
Evaporation Rate	<1

STORAGE AND HANDLING INSTRUCTIONS

DO NOT MIX WITH DIESEL FUEL.

Optimal storage temperature: 23 °F to 77 °F

DEF will freeze at 12 °F

Avoid direct exposure to sunlight

ISO 22241 standards require the use of only stainless steel and/or certain plastics, such as high density polyethylene (HDPE) or polypropylene, to store DEF in order to prevent contamination and SCR failure.

Materials specifically not recommended include non-ferrous metals and alloys (copper, aluminum, magnesium, silver, zinc and lead), solders containing non-ferrous metals, and nickel-coated plastics and metals.
